Hello! I'm from Ukraine. Now I am in Wroclaw. I have been living here for 3 years. I'm a professional results-oriented Front-end developer, with a successful record of cross-browser semantic adaptive layout. Flexibility is one of my main features that is why I can adapt to any working conditions. I have about 2 years of freelance experience, creating work for clients by using HTML, CSS, JavaScript, REACT, REDUX, TypeScript, and Bootstrap. So, I think I could be useful to you in achieving your company's goals. I am a quiet, active, open, and motivated individual, due to my strong analytical and critical thinking I can find simple solutions to complex problems. I have a high level of self-organization and self-development. I know how to find a common language with different people, and I am not afraid to take responsibility. I believe that our whole life is a constant continuous development, where our attention, there's our energy, and that in our life increases. Therefore I made my choice.

SKILLS

- **Technologies:** HTML, CSS, SASS/SCSS/LESS, AJAX, AXIOS, REACT, REDUX, API, FORMIK, REDUX-THUNK, REDUX-TOOLKIT, REACT-ROUTER
